

HP Black 1918 Dye Print Cartridge

High-quality intermittent printing on a wide variety of substrates

Target customers

Ideal for companies that require longer decap time for intermittent printing applications.

Applications

- Product identification coding and marking
- Mail addressing

Key highlights

HP print cartridge, with Original HP dye-based ink, designed to maintain optimum performance during intermittent printing on a wide variety of substrates:

- Coated/uncoated papers, labels, specialty substrates
- Provides enhanced glossiness on coated substrates
- Long decap time enables a low-maintenance solution
- Optimum dry time on a wide variety of substrates
- Free, convenient print cartridge return and recycling¹

¹ Contact your equipment and supplies provider or visit hp.com/recycle to see how to participate in the HP Planet Partners program; program may not be available in your area.

Optimize print quality and productivity on your intermittent printing applications. Good decap time enables consistent, high quality and system reliability. With an easy snap-out/snap-in design, see operational and cost efficiencies.

See high-quality results across substrates

Maintain high quality and productivity on intermittent printing applications across a wide variety of substrates including coated and uncoated papers, labels, and specialty substrates. See sharp, crisp, durable output—without smearing or transfer. Print in knockout areas on porous packaging materials and on ink-receptive coatings.

Maintain consistent, reliable printing

See consistently high print quality. Good decap time provides a low-maintenance solution, enabling immediate startup and virtually no printhead servicing between jobs. And with an integrated cartridge design, you get a fresh printhead with each cartridge replacement, enabling high system reliability.

Achieve operational efficiency

Save time and enable reduced operating costs. Original HP 1918 aqueous dye-based black ink provides durable, high-quality printing. And the self-contained customer-replaceable print cartridge includes an easy snap-out/snap-in design, nearly eliminating time-consuming—and costly—routine maintenance.

Technical specifications

HP Black 1918 Dye Print Cartridge

Ink type	Original HP dye-based ink
Resolution	Up to 600 dpi
Nozzle count	300
Print swath	12.7 mm (0.5 in)
Maximum firing frequency	12 kHz
Average drop volume	29 pl
Average delivered ink	40 ml
Number of electrical interconnect pads	52
Operating conditions	10 to 40° C / 50 to 104° F, 10 to 80% RH
Shipping/storage conditions	10 to 40° C / 50 to 104° F, 5 to 80% RH Altitude: 0 to 5000 meters Orientation: nozzles up or side
