

**ODD bay cover for Shuttle's 3-litre PCs**

The Shuttle Accessory MY01 is a permanent cover for the upper storage bay on certain Shuttle's 3-litre PCs. This self-adhesive mylar (robust foil) is intended to protect the empty optical drive bay, in case no optical drive is installed which usually protects the drive bay by itself. The MY01 now offers an additional protection so that no harmful objects can get in. This is especially useful in office or educational environments.

**Compatible with** XH61V, XH81V, XH97V, XH170V & XH110V

**Shuttle Order No:** POI-MY01

**EAN code:** 4046047103034

**Front Panel Mylar**

**MY01**

The mylar MY01

Shuttle 3 litre PC

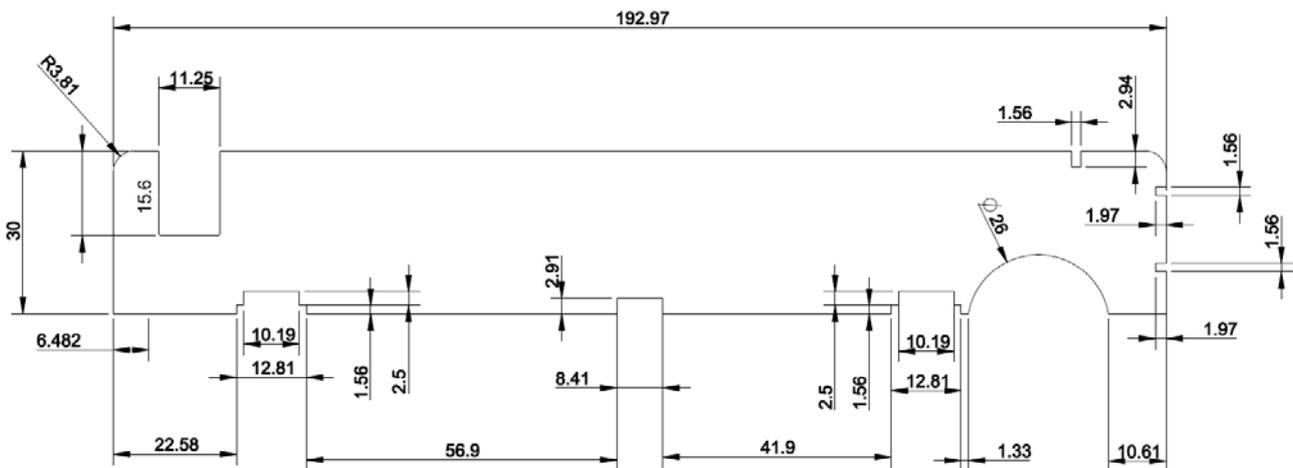

The PC with open front doors. The ODD bay remains empty.

Installation of the self-adhesive mylar

The covered ODD bay.
